

3. Longest Substring Without Repeating Characters

Medium Topics Companies Hint

Given a string `s`, find the length of the **longest substring** without duplicate characters.

Example 1:

Input: `s = "abcabcbb"`
Output: 3
Explanation: The answer is "abc", with the length of 3. Note that "bca" and "cab" are also correct answers.

Example 2:

Input: `s = "bbbbb"`
Output: 1
Explanation: The answer is "b", with the length of 1.

Example 3:

Input: `s = "pwwkew"`
Output: 3
Explanation: The answer is "wke", with the length of 3. Notice that the answer must be a substring, "pwke" is a subsequence and not a substring.

Constraints:

- `0 <= s.length <= 105`
- `s` consists of English letters, digits, symbols and spaces.

Code

Java Auto

```
1
2 class Solution {
3     public int lengthOfLongestSubstring(String s) {
4
5         int[] lastIndex = new int[128];
6
7         for (int i = 0; i < 128; i++) {
8             lastIndex[i] = -1;
9         }
10
11         int left = 0;
12         int maxLength = 0;
13
14         for (int right = 0; right < s.length(); right++) {
15
16             char current = s.charAt(right);
17
18             if (lastIndex[current] >= left) {
19                 left = lastIndex[current] + 1;
20             }
21
22             lastIndex[current] = right;
23
24             int length = right - left + 1;
25
26             maxLength = Math.max(maxLength, length);
27         }
28
29         return maxLength;
30     }
31 }
32
33
```
